HELImetrex Pty Ltd of Australia has achieved another first in civilian UAV flight operations, coordinating the successful demonstrations of an international range of small UAV systems on October 24<sup>th</sup>.

HELImetrex successfully sought Civil Aviation Safety Authority (CASA) approval for integrated UAV operations in Class G airspace from surface to 3000ft AMSL. The airspace approval was granted under HELImetrex existing UAV Operator Certificate (OC) allowing for demonstrations of the payload capabilities of 4 small UAV systems to around 50 invited guests.

HELImetrex ensured that each company conducted their respective flight operations strictly in accordance with HELImetrex OC and CASA regulations. The highlight of the day was a coordinated flight operation with 2 small UAV systems in a 2 hour combined surveillance scenario on various static and moving targets.
